## FIRE DEPARTMENT

Dear Golden Fire Department Stakeholder,

The Golden Fire Department (GFD) is creating our future through the strategic planning process. This planning method is our department's process for defining our strategy so that we can accomplish specific goals and objectives. Strategic planning will be utilized for us to grow over three to four years to reach our mission of "being the best combination fire department in the country".

We consider each of you one of our stakeholders and would appreciate your assistance participating in our strategic planning process. As a stakeholder we are asking you to simply complete this short community outreach survey regarding the services that we provide. This survey should take about five minutes to complete. We appreciate your time and input so we can continue to provide the best fire rescue services to those we serve! Monitor our website and social media sites for more information about the upcoming virtual safety day in September! For more information about the GFD please call 303-384-8094.
