NOTICE ABOUT YOUR WATER METER!!

The City of Golden Water Department is beginning a project to replace all of the water meters that have been in service for longer than 10 years. The City of Golden has selected **Keystone Utility Systems (KUS)** as our meter replacement contractor.

To complete this project, our contractor, **Keystone Utility Systems (KUS)** must have access to your water meter to replace the existing meter and rewire and install a new remote register in the meter pit or on the house. If you have an inside set (inside the house) meter you will receive a separate notice requesting that you schedule an appointment to replace your meter. If your meter is outside in a meter pit, an appointment will not be necessary. This is a system-wide meter replacement project and all City of Golden water customers with older meters will have their water meter replaced. **There is no expense to the customer. The entire cost of installation is covered by the City of Golden Water Department.**

Replacement of the water meter will require a short interruption in water service of approximately 10-15 minutes for residential customers and 45-60 minutes for commercial customers. It is expected that the entire installation and startup will normally be complete in less than 30 minutes (commercial accounts may require a 2 hour appointment). If you are a building owner, please notify your occupants of this future meter replacement and water service interruption. If you have any questions regarding this project please contact...
